SUMMARY

Full-Stack Developer with **1.5+ years** of experience building scalable web applications and real-time platforms across fintech, CRM, and SaaS domains. Skilled in JavaScript and TypeScript with Node.js (Fastify, Express), Angular, React, and Next.js, backed by strong experience in PostgreSQL, MongoDB, Redis, WebSockets, and AWS. Proven track record designing financial data pipelines, payment integrations, and high-performance REST APIs.

EXPERIENCE

Hedged Core — Blackcurrant Labs Pvt Ltd

Full-Stack Developer

app.hedged.in

Jan 2025 – Present

- Built a real-time stock recommendation and trading analytics platform (Angular, Node.js, Express, MySQL) with WhatsApp integration, financial charting, and broker reconciliation systems.
- Engineered large-scale financial data pipelines for P&L, MTM, and reporting, and integrated Cashfree recurring and one-time payment solutions.
- Optimized a critical reporting API, **cutting response time from ~50s to ~5s (10x faster)** through query optimization, indexing, and caching.
- Improved overall backend performance by 30–50%** by tuning SQL queries, indexes, and caching strategies across services.
- Automated background processing with scheduled jobs and queues, **reducing manual operational effort**.

Greenin — Blackcurrant Labs Pvt Ltd

Full-Stack Developer

dev.greenin.com

Jan 2025 – Present

- Engineered a broker extension admin platform with real-time market data, push notifications, and third-party API integrations using WebSockets and AWS S3.
- Built real-time WebSocket services **streaming thousands of live market updates daily** across the platform.

Zhyllar — Blackcurrant Labs Pvt Ltd

Full-Stack Developer

app.zhyllar.com

Jan 2026 – Jul 2026

- Built monetization and subscription-management features for a CRM platform, including Stripe recurring and one-time payment integration.
- Developed dynamic subscription provisioning, usage metering, and billing automation using Angular, Node.js, Express, and MySQL.
- Implemented email notification workflows and customer-lifecycle automations for scalable customer and subscription management.

Scale N Evolve

Independent Software Consultant

scalenevolve.com

May 2026

- Built a SaaS platform featuring habit tracking, budget management, and unified analytics dashboards with heatmaps and data visualizations.
- Integrated **3+ third-party services** (Shopify Payments, ZeptoMail) for subscription billing, transactional email, and user-activity tracking.

PROJECTS

Excel Clone

Collaborative spreadsheet application inspired by Microsoft Excel with real-time sync, virtual scrolling, chunk-based data loading, formula support, and offline caching.

- Reduced DOM rendering from **100,000+ cells** to only the visible viewport using virtual scrolling, **dramatically improving render performance**.
- Implemented chunk-based loading to fetch only visible spreadsheet regions, **significantly reducing network traffic**.
- Cut redundant backend requests with a client-side IndexedDB caching layer that also **enables offline support**.
- Added Redis caching and optimized PostgreSQL queries for fast spreadsheet retrieval.
- Developed REST APIs with Fastify and Prisma, and containerized the application with Docker.

Chess Engine

chessvalidator.netlify.app

Jun 2025 – Sep 2025

Chess application with a custom C++ rules engine for move generation, validation, and game-state evaluation, bridged to a React frontend via a JavaScript interop layer.

- Built a custom C++ rules engine for move generation, validation, and game-state evaluation.
- Bridged the C++ engine to a React frontend via a JavaScript interop layer.
